Task 4 - Q-learning and the game Find the cheese

Consider the simple game with the name "Find the cheese". The goal of the game is to find out the cheese and to avoid the holes (obstacles). Walker cannot step on the place denoted as a hole. In the opposite case, the game is over.

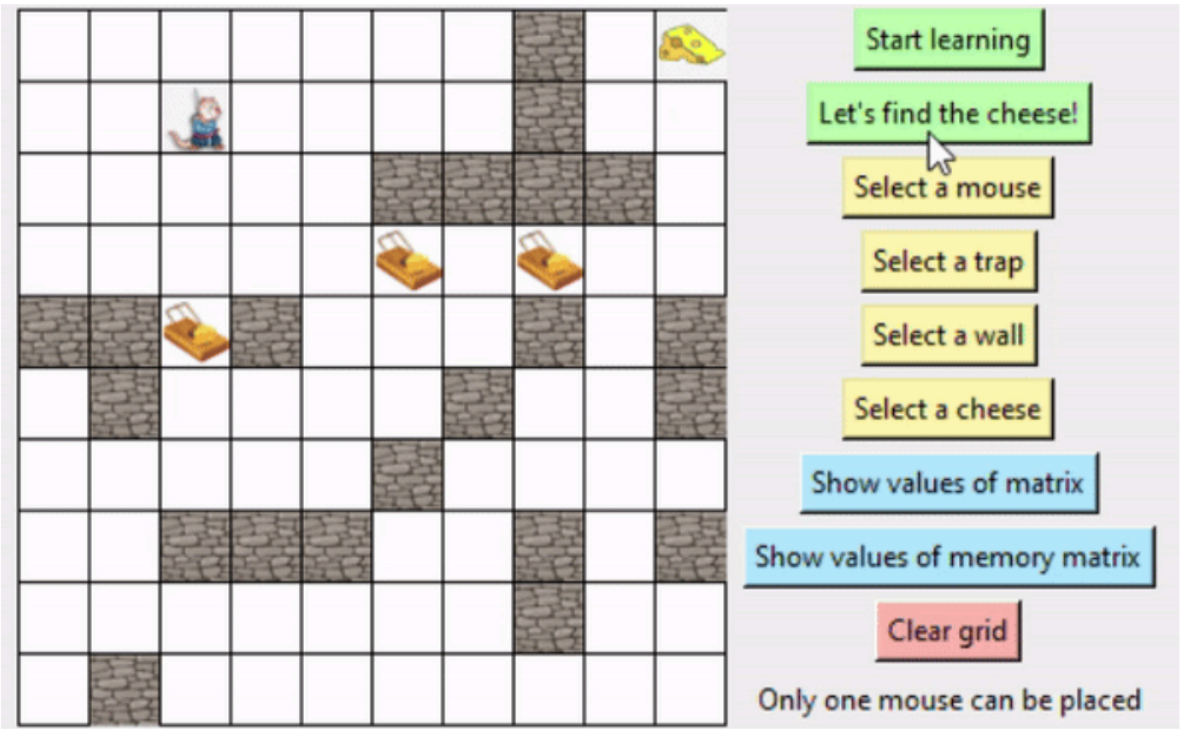
*				
	O			O
			C	

Playing area

C - denotes a cheese
O - hole (an obstacle)
* - actual position of a walker

Instructions

1. Use a Q-learning to learn a walker to find the cheese and to avoid the holes
2. How many iterations do you need to learn to be a walker?
3. Visualize the process of searching - **do not use a text editor**.



Example
